From: League of Legend professional team
To: DBA team

"Hello DBA team! I hope this message finds you well. I would like to Develop some game strategies. Could you please assist me with the following questions?"

Part 1 :From the chaompion_data database

1. How should you choose your summoner spells and skill order when playing Jax?

2. How should you choose your items when playing Jax?

3. Your opponent locked in Jax. Which champions should you pick to counter him, and which ones should you avoid?

4. Your opponent has locked in Jayce as a top laner. Which champions have the highest win rate against him, and what are the best items, skill order, and summoner spells for the chosen champion?

5. Give me 5 random champions who have a higher win rate than the average win rate of all champions .(using sub query)

Part 2 :From the chaompion_data database

Now I would like to propose some suggestions to Riot Games for improving game balance, aiming to create a better and more enjoyable gaming environment.Could you please assist me with the following questions?

1. Please write a query that lists average win_rate for each position.

2. Display the champion that has been strongly countered more than 20 times.

3. Show the item combinations with an average win rate exceeding 60% and an average pick rate over 30%."

4. Display the top 5 item combinations ranked by average pick rate.

Thank you for your help on this matter.
